

Wo**FTP**
MECHANICAL COMPONENTS

weftp.com.tr

WEFTP serve a wide variety of industry sectors

With the goal of good value and great quality.

WEFTP supply all types of ferrous and non-ferrous castings including Grey & SG Irons, Stainless Steels, plus Aluminium & Copper Alloys bespoke to our customers' requirements.

We're specialized in castings, forgings and machining supplies, in any kind of material (steel, cast iron, aluminium) in any quantity: from small batches to big lots.

Whatever the size, shape, quantity or material, WEFTP cater for ALL your casting and forging needs.

Contact us for a quote on your next casting project.

Products and application areas

Gears, rolled rings, pulleys, crowns, flanges, bearings, shafts, gears, mechanical and ductile iron products, gear boxes, geared motors, couplings, bushings, and much more.

We work at the service of large manufacturing companies operating in many industries, including:

Automotive

Agricultural Machinery

Reducers

Transmissions

Earth-moving Machines

Hydraulic

Pneumatic

CASTINGS

Specialist Ferrous & Non-ferrous Castings our customers buy castings from us because they know we can deliver in terms of quality, value for money and customer service. This is why WeFTP is the leading supplier of fully machined and finished castings.

The experienced team at WeFTP has met varying challenges over the years delivering castings in all sorts of sizes and materials. We are specialists in ensuring that your order is delivered in the most efficient and effective manner to suit your business needs.

TYPES OF CASTINGS WEFTP DELIVERS:

- Grey iron
- Spheroidal graphite iron
- Steel iron

ALUMINUM CASTINGS

WEFTP offers aluminium die-castings with the maximum quality related with a really good price in any grade.

INVESTMENT CASTING

Precision Lost Wax Casting

WEFTP can produce casting pieces from 5 g to 30 kg by our high technology injection presses.

We supply to many sectors sectors of Automotive, Machine, Defense, Medical, Agriculture and many other industries.

FORGING

WEFTP can supply forgings in any kind of material, carbon steel, alloy steel, stainless steel to get out any type of shape: gears, crowns, flywheels, covers, rods, pistons rods, camshafts, forks, rings, cylinders, hubs and more, from applications areas are, agriculture and earthmoving machines, railways, petrol-chemical, transmissions and many other sectors.

MACHINING

Precision machining

We cooperate with some machine shops in order to satisfy every kind of our client's requirements. All of our machine shops are supplied by latest generation machinery.

- > CNC Horizontal Machining Centres
- > CNC Vertical Machining Centres
- > CNC Lathes
- > CMM Inspection

Other services include Broaching, Grinding & Assembly.

OUR LABS

SECTORS

AUTOMOTIVE

WEFTP is the right company for the production and supply of automotive components. We are able to manage the molding and supply of various types of metal parts such as connecting rods, pistons, washers, supports, axles, flanges, shafts, gears, pulleys, damper pulleys and all types of components for crankshaft pulleys.

We guarantee finished products of high quality, as we are able to select the best metals and alloys for the realization of each single piece.

AGRICULTURAL MACHINERY

We are available to our customers for the supply of any type of metal component functional to the correct construction or maintenance of agricultural machinery and equipment: joints, bushings, sleeves, fifth wheels, brake boosters, trailer accessories, axles, spacers, hubs, rollers, counterweights and many others.

We also manufacture components for agricultural machinery according to design, in order to deliver tailor-made products for each specific model of machine, ensuring its perfect functionality and quality.

EARTH MOVING MACHINERY

Components for earth moving machines such as excavators and crawlers, WEFTP is able to ensure the supply of high quality metal components at advantageous prices.

Some of the main components required for this type of machine are: hydraulic cylinders, pipes, reducers, flanges, pins of various kinds, fittings, tracks, supports, medium and large steel castings and many others.

TRANSMISSIONS

The transmission is composed of all those elements that must transmit the power generated by the engine to the final elements such as, for example in cars, the wheels.

In particular, we are specialized in the supply of parts such as: rotating manifolds, control forks, transmission joints, brake disc, connecting rods, crankshaft and many others.

HYDRAULIC

We produce components for hydraulic systems according to drawings, guaranteeing quality and max precision.

You can contact us for the purchase of hydraulic cylinders, fittings, heads, stainless steel valves, gear pumps and much more!
